CIVILIZATION OUR LIFE IN FOCUS

13.3.–19.7.2026
Museum für Gestaltung Zürich
Ausstellungsstrasse

Progress and freedoms, conventions and crises: never before have so many humans inhabited the Earth at the same time. Despite our vastly different lifestyles, certain key events, inventions, and experiences connect us—whether consciously or unconsciously. Over 100 international photographers have created a multifaceted portrait of the past 30 years through around 250 images. The result is a familiar yet surprising snapshot of our civilization, told in the language of photography.

This exhibition was co-produced by the Foundation for the Exhibition of Photography FEP, Minneapolis/Paris/Lausanne, and the National Museum of Modern and Contemporary Art of Korea in collaboration with the Museum für Gestaltung Zürich.
